

Construction of our hospital began in 1939. After countless volunteer hours and local fundraisers, we opened our doors in 1944. The everyday functions relied on a strong spirit of volunteerism. To this day, we believe that dedicated people behind our operations are truly our greatest asset.

Through the years, we have progressively expanded by adding more locations and providers to offer more specialized care. Due to great leadership, providers and staff, we are known for our innovation and growth as we have become the largest rural independent healthcare system in the State of Utah.

Our vision is Health & Healing... Every Person, Every Time. Through Our Healing Model, we strive to provide a healing environment while focusing on the patient experience.

We are a local 501(c)(3) hospital led by community-minded individuals who make decisions based on what is best for our community. As a non-profit hospital, we are honored to be an integral part of the communities we serve, truly investing in you.

We are loyal to this region, and will continue to provide quality, compassionate care while introducing the latest technology and growing to meet your needs here at home.
