

Since our meager beginnings in 1944 we have been razor focused on doing all we can to help our community have access to and to receive the very best in healthcare services close to home. At Uintah Basin Healthcare we take this mission seriously. Our mission drives the decisions and investments we make in our community and every strategic partnership we establish. **Our mission is, "Caring for our communities through access to compassionate quality healthcare and investing in those we serve".**

You'll notice that we are the largest independent rural healthcare system in Utah. This growth didn't happen by accident, it has been because of an intentional focus of our organization over the last 75 years to put the patient first. As a locally owned not for profit organization, all profits are reinvested in our communities to ensure that we continue to expand needed services to truly help our communities have access to the very best healthcare has to offer without having to leave the Basin whenever possible. By focusing on our patients needs and working to provide an exceptional service, our growth has continued naturally.

We are very excited for the future as we continue to improve our ability to expand new health and healing services to our communities.

-Jim Marshall, President & CEO
